PROBLEM STATEMENT

- TO MAKE A WORKABLE TURNED BASED GAME, CONSISTING OF CARDS, THAT CAN BE PICKED UP BY MOVING A MAIN CHARACTER CARD.
- TO CREATE A RELEVANT GUI, TO ADD THE REQUIRED AESTHETICS.
- ALLOW UP TO 4 PLAYERS IN THE TURN BASED APPROACH.
- DEFINE RULES AROUND THE MOVEMENT OF THE CARDS.
- DEFINE A METHOD TO CALCULATE THE SCORES FOR EACH OF THE PLAYER
- CREATE AN AGENT TO COMPETE AGAINST A HUMAN PLAYER.

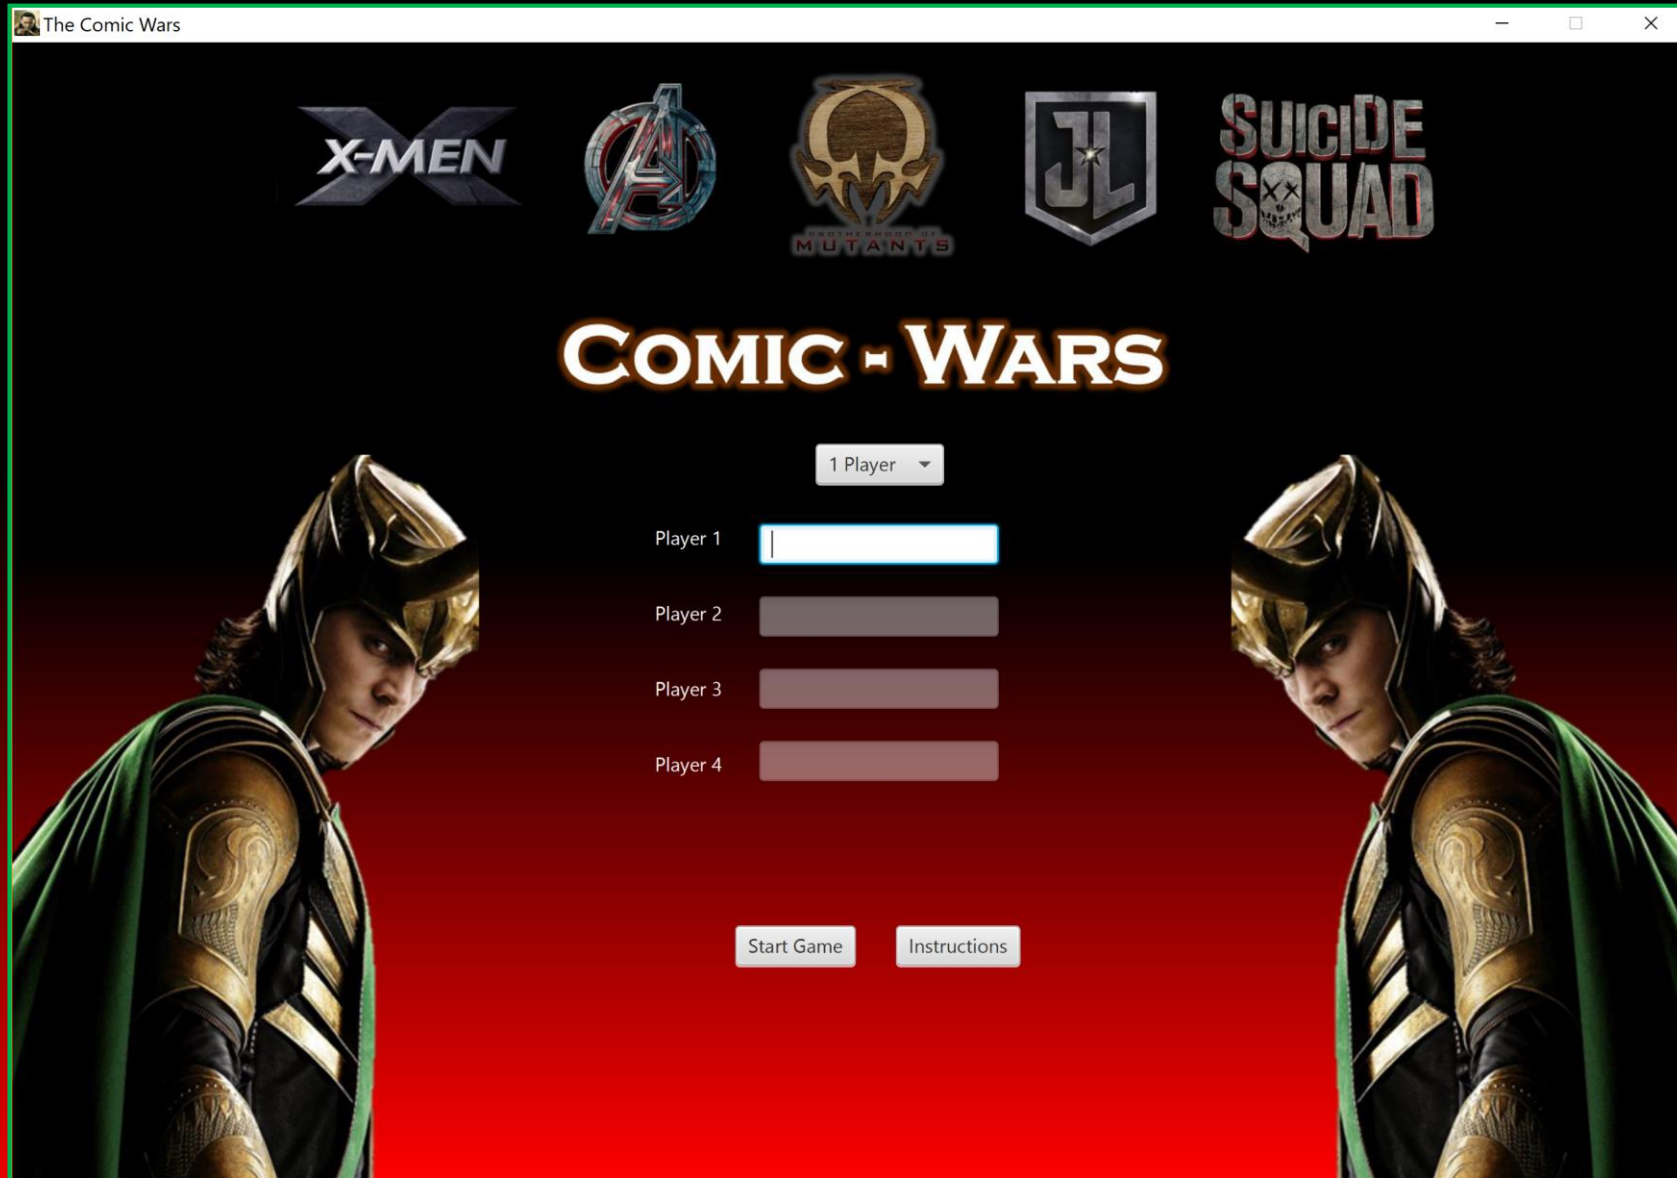

DESIGN APPROACH/SUMMARY

IT WAS IMPORTANT FOR US TO BUILD A GUI THAT CONNECTED WITH PEOPLE, WITH A BACKEND THAT SUPPORTED THE FUN IN GAMING. THIS INCLUDED CONSTRUCTING AND DELIVERING THE FOLLOWING STEPS:

- DEFINING AND IMPLEMENTING METHODS FOR THE BOARD SETUP, AND CONTROL, AND GAME RULES.
- DESIGNING A BASIC WORKABLE INTERFACE STRUCTURE WITHOUT ANY COSMETIC ENHANCEMENTS.
- FINALIZING A THEME FOR THE GAME, AND CREATING THE IMAGES, AND MULTIMEDIA COMPONENTS REQUIRED.
- ADDING PLAYER SELECTION, AND MAKING IT WORKABLE FOR MULTIPLE PLAYERS.
- ADDING A SIMPLE BOT TO PLAY AGAINST A HUMAN PLAYER IN SINGLE PLAYER MODE.
- DEFINING THE SCORING SYSTEM, AND ENHANCING THE VISUAL COMPONENT OF THE APPLICATION.
- FINALLY CREATING A MORE ADVANCED AI COMPETITOR TO COMPETE AGAINST IN SINGLE PLAYER MODE.

EVEN THOUGH THIS DESIGN APPROACH WORKED GREAT, A EARLIER START TO THE ADVANCED AI COMPETITOR, AND USER INTERFACE, MIGHT HAVE RESULTED IN MORE OPTIMIZED RESULTS.

HELP SCREEN

Welcome To Comic Wars!
I am Loki, The God of Mischief,
I'm building my army, and YOU are my commander. Let me run you through the basics.

You can move me around using letters from the layout and typing them in the box below

Board Layout =

4	Y	S	M	G	A
5	Z	T	N	H	B
6	0	U	O	I	C
7	1	V	P	J	D
8	2	W	Q	K	E
9	3	X	R	L	F

Player Move:

Each card represents members of the 7 teams

Every position I go, I pick up a member of the team and your name appears next to the team. The score shows number of teams and cards.

The person with the maximum teams wins! If two players have the same number of teams. The one with the highest number of cards wins!

ARE YOU READY?!
